

SCARLETT ANDERSON

Software Tester | QA Automation | SDLC Expert

+1-(234)-555-1234 Email [linkedin.com](#) [GitHub](#) Austin, Texas

SUMMARY

With over 6 years of software testing experience, expertise in automated tools like Selenium has significantly improved product quality by 35%. Effective collaboration with developers and a keen eye for detail have driven successful projects, achieving a 50% reduction in defect rates.

SKILLS

Automated Testing, Selenium, JIRA, Python, TestComplete, Regression Testing

EXPERIENCE

Senior Software Tester

Austin, Texas

RapidTech Solutions

03/2023 - Present

- Successfully designed and executed test plans for over 20 software modules, improving release accuracy by 30%.
- Utilized Selenium to automate testing processes, enhancing test coverage and reducing testing time by 40%.
- Collaborated with development teams and PMs to diagnose and resolve defects, reducing turnaround time by 25%.
- Improved bug tracking processes using JIRA, leading to a 15% increase in defect recovery rate.
- Conducted comprehensive regression testing, minimizing release-related defects by 50%.

QA Engineer

Remote/Onsite, San Antonio, Texas

TechInnovate Solutions

07/2020 - 03/2023

- Led the implementation of automated testing frameworks, increasing testing efficiency by 35% using TestComplete.
- Developed and maintained test scripts in Python, enhancing performance testing and reducing errors by 20%.
- Collaborated closely with cross-functional teams to review user stories, ensuring comprehensive coverage.
- Monitored and coached junior testers, improving team performance by 25%.

Software QA Analyst

Austin, Texas

DataForward

01/2020 - 07/2020

- Executed detailed test cases for web applications, resulting in a 30% reduction in detected bugs post-release.
- Identified and documented over 50 software defects, leading to an improved development process.
- Worked collaboratively with the software team, enhancing communication and project flow efficiency by 15%.
- Configured and maintained test environments, optimizing test setup times by 20%.

EDUCATION

Bachelor of Science in Computer Science

Austin, Texas

University of Texas at Austin

01/2016 - 01/2020

PROJECTS

Open Source Bug Tracker

Developed a lightweight bug tracking tool for small teams to manage defects efficiently. [github.com/scarlett_open_bug](#)

Automated Testing Suite

Contributed to an open-source project that improved test automation frameworks. [github.com/scarlett_automated_suite](#)

KEY ACHIEVEMENTS

Reduced Defect Rate

Implemented automated testing methods, reducing overall defect rate by 40% within one year.

Identified Critical Bugs

Discovered critical bugs before release, saving the company potential losses exceeding \$100,000.

Enhanced Testing Efficiency

Developed test cases that improved testing efficiency by 35%, increasing team productivity.

Improved QA Process

Streamlined the QA process, lowering defect turnaround time from 5 days to 3 days.
